

T 8055 EN

Type 3253-1 and Type 3253-7 Pneumatic Control Valves

Type 3253 Three-way Valve

DIN version

Application

Mixing or diverting valve for process engineering applications with high industrial requirements

Valve size	DN 15 to 500
Pressure rating	PN 10 to 400
Temperatures	-196 to +550 °C

Special features

Type 3253 Three-way Valve with

- Type 3271 Pneumatic Actuator (Type 3253-1 Control Valve)
- Type 3277 Pneumatic Actuator (Type 3253-7 Control Valve) for integral positioner attachment

Valve body made of

- Cast iron
- Cast steel
- Cast stainless steel, high-temperature cast steel or cast cold-resisting steel

Two spring-loaded PTFE V-ring packings or two adjustable high-temperature packings

On request with a test connection between the two packings.

Conversion between mixing and diverting services by

reversing the seat-guided valve plug

Optional with RFID tags with one-to-one device marking according to DIN SPEC 91406.

The control valves with their modular design can be equipped with various accessories:

Positioners, limit switches, solenoid valves and other accessories according to IEC 60534-6 ¹⁾ and NAMUR recommendation. Refer to Information Sheet ► T 8350 for more details.

Versions

Standard version with PTFE packing for temperatures from -10 to +220 °C or with adjustable high-temperature packing for -10 to +350 °C

- **Type 3253-1** (Fig. 1) · Type 3253 Valve and Type 3271 Actuator with 350 to 2800 cm² actuator area (see Data Sheets ► T 8310-1, ► T 8310-2 and ► T 8310-3)
- **Type 3253-7** · Type 3253 Valve and Type 3277 Pneumatic Actuator with 350 to 700 cm² actuator area, for integral positioner attachment (see Data Sheet ► T 8310-1)

¹⁾ Accessories required. See associated actuator documentation.

Fig. 1: Type 3253-1 Pneumatic Control Valve with Type 3271 Actuator

Further versions:

- **Insulating section or bellows seal** · See Technical data
- **Additional handwheel** · See Data Sheets ► T 8310-1, ► T 8310-2 and ► T 8310-3
- **ANSI version** · NPS ½ to 20, Class 300 to 2500 · See Data Sheet ► T 8056
- **Type 3244** · DN 15 to 150, PN 10 to 40; NPS ½ to 6, Class 150 to 300 · See Data Sheet ► T 8026
- **Type 3253-2 Electric Control Valve** · Details on request
- **Type 3253-3 Manually Operated Valve** with Type 3273 Hand-operated Actuator · See Data Sheet ► T 8312

Principle of operation

Depending on the plug arrangement, the three-way valve can be used either as a mixing or diverting valve.

In mixing valves, the process media to be mixed enter at valve ports A and B. The combined flow exits the valve at port AB (Fig. 2 and Fig. 3). The flow rate from ports A or B to AB depends on the cross-sectional area of flow between the seats and plugs.

In diverting valves, the process medium enters at the valve port AB and the partial flows exit at ports A and B (Fig. 4).

Fail-safe position

Depending on how the springs are arranged in the pneumatic actuator (see Data Sheets ► T 8310-1, ► T 8310-2 and ► T 8310-3), the valve has two different fail-safe positions that become effective when the supply air fails.

- **Actuator stem extends:** when the supply air fails, port B is closed in mixing valves and port A is closed in diverting valves.
- **Actuator stem retracts:** when the supply air fails, port A is closed in mixing valves and port B is closed in diverting valves.

Fig. 2 to Fig. 4 show configuration examples.

Fig. 2: Type 3253-1 Control Valve with Type 3271 Pneumatic Actuator and additional handwheel, body version for DN 50 to 500, plug arrangement for mixing service (anti-rotation fixture for DN 50 and larger)

Fig. 3: Type 3253 Three-way Valve, body version for DN 15 to 40, plug arrangement for mixing service
plug arrangement for diverting service DN 15 to 25

Fig. 4: Type 3253-7 Control Valve with Type 3277 Pneumatic Actuator (only up to DN 100), body version for DN 40 to 500, plug arrangement for diverting service (anti-rotation fixture for DN 50 and larger)

Notes on the differential pressure tables

- Bench ranges highlighted in gray apply to standard operation ($p_2 = 0$), i.e. at rated travel · Bench ranges not highlighted apply to the maximum pretensioned springs
- Bench ranges not highlighted apply to the maximum pretensioned springs.
- Differential pressures in parentheses refer to the values for half travel in parentheses in the bench range row
- The springs in actuators with fail-safe action "actuator stem retracts" cannot be preloaded.

Selection and sizing of the control valve

1. Calculate K_v coefficient according to IEC 60534-6
2. Select valve size DN and K_{vs} coefficient from Table 3 and Table 4
3. Determine the permissible differential pressure Δp from Table 4
4. Select the valve body material from Table 1 and Table 2 as well as from the pressure-temperature diagrams in Information Sheet ► 8000-2
5. Select accessories from Table 1 and Table 2.

Ordering text

Valve size	DN
Pressure rating	PN
Body material	Refer to Table 2
Bonnet	Standard bonnet, insulating section or bellows seal
Type of connection	Flanges
Actuator	Type 3271 or Type 3277 (see Data Sheets ► T 8310-1, ► T 8310-2 and ► T 8310-3)
Fail-safe position	Actuator stem extends/retracts
Process medium	Density in kg/m^3 and temperature in $^{\circ}\text{C}$
Flow rate	kg/h or m^3/h in standard or operating state
Pressure	p_1 and p_2 in bar (absolute pressure p_{abs}) (with minimum, normal and maximum flow rate)
RFID tag	Yes/No
Valve accessories	Positioner and/or limit switch
