

Major Milestones in the Development of SAMSON Positioners

<Development year="1957" title="STP 703" description="The first pneumatic positioner by SAMSON" />
<Development year="1973" title="i/p and p/i converters" description="Linking element between pneumatics and electronics" />
<Development year="1974" title="Type 3762" description="Electropneumatic positioner" />
<Development year="1987" title="New standard" description="Integral positioner attachment with internal air routing" />
<Development year="1989" title="Prototype" description="The world's first fieldbus positioner" />
<Development year="1995" title="Type 3780" description="Digital positioner with HART® communication" />
<Development year="1999" title="TROVIS-VIEW" description="Intuitive configuration and operation software" />
<Development year="2000" title="Type 3787" description="Positioner with FOUNDATION™ fieldbus communication" />
<Development year="2001" title="Series 3730" description="Positioners with hybrid technology and integrated valve diagnostics" />
<Development year="2004" title="Series 3730" description="Certification according to IEC 61508 for use in safety-instrumented systems" />
<Development year="2006" title="Series 3730" description="Partial stroke testing function for safety-instrumented systems" />
<Development year="2006" title="Series 3731" description="Flameproof positioners" />
<Development year="2011" title="Type 3730-4" description="The first PROFIBUS field unit in which the ID number can be adapted" />
<Development year="2011" title="Type 3730-6" description="Positioner with HART® communication and integrated pressure sensors" />
<Development year="2015" title="TROVIS SAFE series" description="Positioners optimized for attachment to pneumatic on/off valves in safety-instrumented systems" />
<Development year="2016" title="TROVIS 3793" description="New positioner generation with modular design and high air capacity" />
<Development year="2017" title="SAM DIGITAL" description="BPCS-independent, web-based solution for management and visualization of positioner data" />
